Bureau of Labor Statistics, Office of Employment and Unemployment Statistics, 2008 OCLC Number: (OCoLC)231619916 Subject: Disaster victims - Gulf States -- Economic conditions. Excerpt: . . . percent of the difference in hours worked and only about 5 percent of the difference in the employment-population ratio and cannot explain the difference in the labor force participation 19 rate. Thus, while individual and family characteristics can explain some of the differences in labor market outcomes between groups, a substantial proportion of the difference cannot be explained by these factors. When we add to equation (2) the interaction between the linear time trend and the returning variable, the estimated coefficients on the interaction term suggest that differences between returnees and non-returnees (controlling for individual and family characteristics) did not consistently decrease or increase over time (column 5 of Table 6). In an enriched specification with month year dummies replacing the linear time trend, monthly estimates of the differences between returnees and non-returnees increased over the first half of...
