Pages Number: 298 Publisher: Central South University. Pub. Date :2008-11-01. This book is a reference to the former State Education Commission issued the Higher Technical School-based curriculum of basic requirements and Higher engineering specialist basic requirements of electronic technology-based courses, and consider the 21st century, the requirements of education reform, to ensure the basic experimental operation, based on the focus on enhancing the design of integrated application, innovation, computer application ability of the various experimental analysis of content and application of computer simulation technology together. The main contents are: experimental knowledge of electronic technology, analog electronic circuit experiments, design and simulation, experimental digital electronic circuits, design and simulation, as well as appendices (including the commonly used electronic measuring instruments, commonly used components, integrated circuits, instructions, etc.). Experimental content and degree of difficulty covering the different levels of teaching requirements, can be flexibly chosen. This book uses an electronic circuit simulation software is EWB5.0. The simulation software has an intuitive, easy to learn, easy to operate, and many other advantages. This book can serve as Undergraduate Electrical Information and higher specialist electrical engineering class, electronics and other professional electronic technology experimental materials, but also as an electronic reference book lovers of learning. Contents: The first part of the experimental knowledge of an electronic technology, electronic technology-based experimental purpose and significance of two electronic technology the basic requirements of three experiments, the electronic circuit debugging four, five failed inspection methods, failure analysis example six. Electronic Technology Experimental in computer-aided analysis and design automation (EDA) technology second part of the analog electronic circuit experiments, experimental design and simulation-based electronic devices commonly used in Experiment 1 the use of experimental single-tube amplifier...
