

## Job Scheduling Strategies for Parallel Processing: 11th International Workshop, Jsspp 2005, Cambridge, Ma, USA, June 19, 2005, Revised Selected Papers

Filesize: 2.93 MB

### **Reviews**

*A really awesome book with lucid and perfect information. Of course, it is actually play, nonetheless an amazing and interesting literature. You are going to like just how the article writer create this ebook.*

*(Nakia Toy Jr.)*

## **JOB SCHEDULING STRATEGIES FOR PARALLEL PROCESSING: 11TH INTERNATIONAL WORKSHOP, JSSPP 2005, CAMBRIDGE, MA, USA, JUNE 19, 2005, REVISED SELECTED PAPERS**

To read **Job Scheduling Strategies for Parallel Processing: 11th International Workshop, Jsspp 2005, Cambridge, Ma, USA, June 19, 2005, Revised Selected Papers** eBook, remember to refer to the link under and download the document or get access to additional information that are in conjunction with **JOB SCHEDULING STRATEGIES FOR PARALLEL PROCESSING: 11TH INTERNATIONAL WORKSHOP, JSSPP 2005, CAMBRIDGE, MA, USA, JUNE 19, 2005, REVISED SELECTED PAPERS** ebook.

Springer. Paperback. Book Condition: New. Paperback. 283 pages. Dimensions: 9.2in. x 6.1in. x 0.6in. This volume contains the papers presented at the 11th workshop on Job Scheduling Strategies for Parallel Processing. The workshop was held in Boston, MA, on June 19, 2005, in conjunction with the 19th ACM International Conference on Supercomputing (ICS05). The papers went through a complete review process, with the full version being read and evaluated by an average of five reviewers. We would like to thank the Program Committee members for their willingness to participate in this effort and their excellent, detailed reviews: Su-Hui Chiang, Walfredo Cirne, Allen Downey, Wolfgang Gentzsch, Allan Gottlieb, Moe Jette, Richard Lagerstrom, Virginia Lo, Jose Moreira, Bill Nitzberg, and Mark Squillante. We would also like to thank Sally Lee of MIT for her assistance in the organization of the workshop and the preparation of the pre-conference proceedings. The papers in this volume cover a wide range of parallel architectures, from distributed grids, through clusters, to massively-parallel supercomputers. The diversity extends to application domains as well, from short, sequential tasks, through interdependent tasks and distributed animation rendering, to classical large-scale parallel workloads. In addition, the methods and metrics used for scheduling and evaluation include not only the usual performance and workload considerations, but also considerations such as security, fairness, and time zones. This wide range of topics attests to the continuing viability of job scheduling research. The continued interest in this area is reflected by the longevity of this workshop, which has now reached its 11th consecutive year. The proceedings of previous workshops are available from Springer as LNCS volumes 949, 1162, 1291, 1459, 1659, 1911, 2221, 2537, 2862, and 3277 (and since 1998 they have also been available online). This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
